

UNAPPROVED PARTS NOTIFICATION

Aircraft Certification Service

FAA
Aviation Safety

No: 2018-2017-0001120 **(Rescinded March 9, 2018)**

Date: February 15, 2018

<http://www.faa.gov/aircraft/safety/programs/sups/upn>

BACKGROUND

On February 15, 2018, the FAA issued Unapproved Part Notification (UPN) 2018-2017-0001120 for the part numbers stated below and distributed by Genesis Aviation Inc. between the dates of February 21, 2017 and June 14, 2017. The FAA has determined that Genesis Aviation relied on information supplied by an FAA designee indicating the parts were approved. The initial UPN reported that the articles listed below were distributed without evidence of traceability to a FAA Production Approval Holder (PAH).

After further investigation with the full cooperation of Genesis Aviation, the FAA determined that the articles referenced in the original UPN were traceable to a PAH, traceable to an approved design by which an airworthiness determination can be made, or quarantined.

AFFECTED PRODUCTS

Articles distributed from Genesis Aviation Inc.:

1. Clamp Loop, Cushion, part number TA025030-06
2. Filter Element, part number 26570
3. Base Plate, part number 232012 and
4. Bushing, part number S700B0455-6C011
